ID Link Cloud

ID Link Cloud is a comprehensive cloud based hosting service for the IDENTIC ID Link software platform which provides a secure virtual "home" for the ID Link servers, databases, applications and data held within the ID Link software environment. IDENTIC uses the Microsoft Azure® platform and its collection of integrated cloud services to host the ID Link Cloud services, ensuring maximum availability and security.

Security - Microsoft Azure® is a highly trusted cloud service that ensures the security and integrity of ID Link Cloud, regardless of the size or complexity of the customers ID Link configuration. The ID Link Cloud services include Virtual Machines, SQL databases, storage, backup and web applications, providing maximum flexibility to suit the customers current and future requirements. Backed by the Microsoft Azure® assurances of availability and data integrity, ID Link Cloud satisfies the highest requirements set by customer IT departments.

Cost efficient and reliable IT solutions are an essential requirement of todays businesses. By selecting ID Link Cloud, customers can focus on their core business activities and be assured that the ID Link applications and data are always available and operational 24/7. ID Link Cloud removes the need for customers to manage and maintain costly in-house computer systems or maintain software licences and databases, so reducing expenditures and increasing overall reliability.

Scalable - customers using ID Link Cloud combine the performance of a world-class supercomputer environment with the scalability of the cloud. The Azure® platform provides built in redundancy, protecting the customers investment and ensuring continuous uptime. ID Link Cloud is quickly and easily scalable, regardless of the customers size, the number of physical sites or ID Link systems which are connected to the ID Link service.

Microsoft and Microsoft Azure® is the registered trademark or trademark of Microsoft Corporation in the United States and/or other countries.
